

## dCache mon

dCache mon is a simple monitoring tool for several interesting values of an dCache cluster.

It was written by *Clemens Weninger*, a student at Ludwig-Maximilians-Universität München.

The following information is monitored:

- Space Information (global, per pool, per space token)
- Mover Queues
- Histograms of transfers-speeds and transfer-times.

It has the following dependencies

- Python
- Django
- rrdtool and its Python-bindings

A working instance can be found at:

<http://lcg-lrz-site-mon.grid.lrz-muenchen.de/dcache-mon/>
