

# dCache Beginners Course

## Welcome

**Some words on what you can expect to come now.**

Karlsruhe Institute of Technology (KIT), Steinbuch Centre for Computing (SCC)

# Welcome to dCache Beginners Course

- This course is organized in cooperation with dCache.org and the German Support Group for dCache.
- It is very similar to the dCache Administration Course held during last years GridKa School.
  - Almost all the content is also taken from that presentations and other materials. Therefore, credits go to the respective original authors.
- The timetable and materials to this course can be found at [http://gkswiki.fzk.de/index.php5/DCache\\_Beginners\\_Course](http://gkswiki.fzk.de/index.php5/DCache_Beginners_Course)
  - First you will get a theoretical overview to dCache.
  - Then we will install a basic dCache setup on virtual machines provided by DESY Zeuthen.
  - After we have successfully verified the functionality of our setup, we will continue with some theoretical lectures.
