

dCache-View

Olufemi S. Adeyemi

On behalf of the project team

<Objective/>

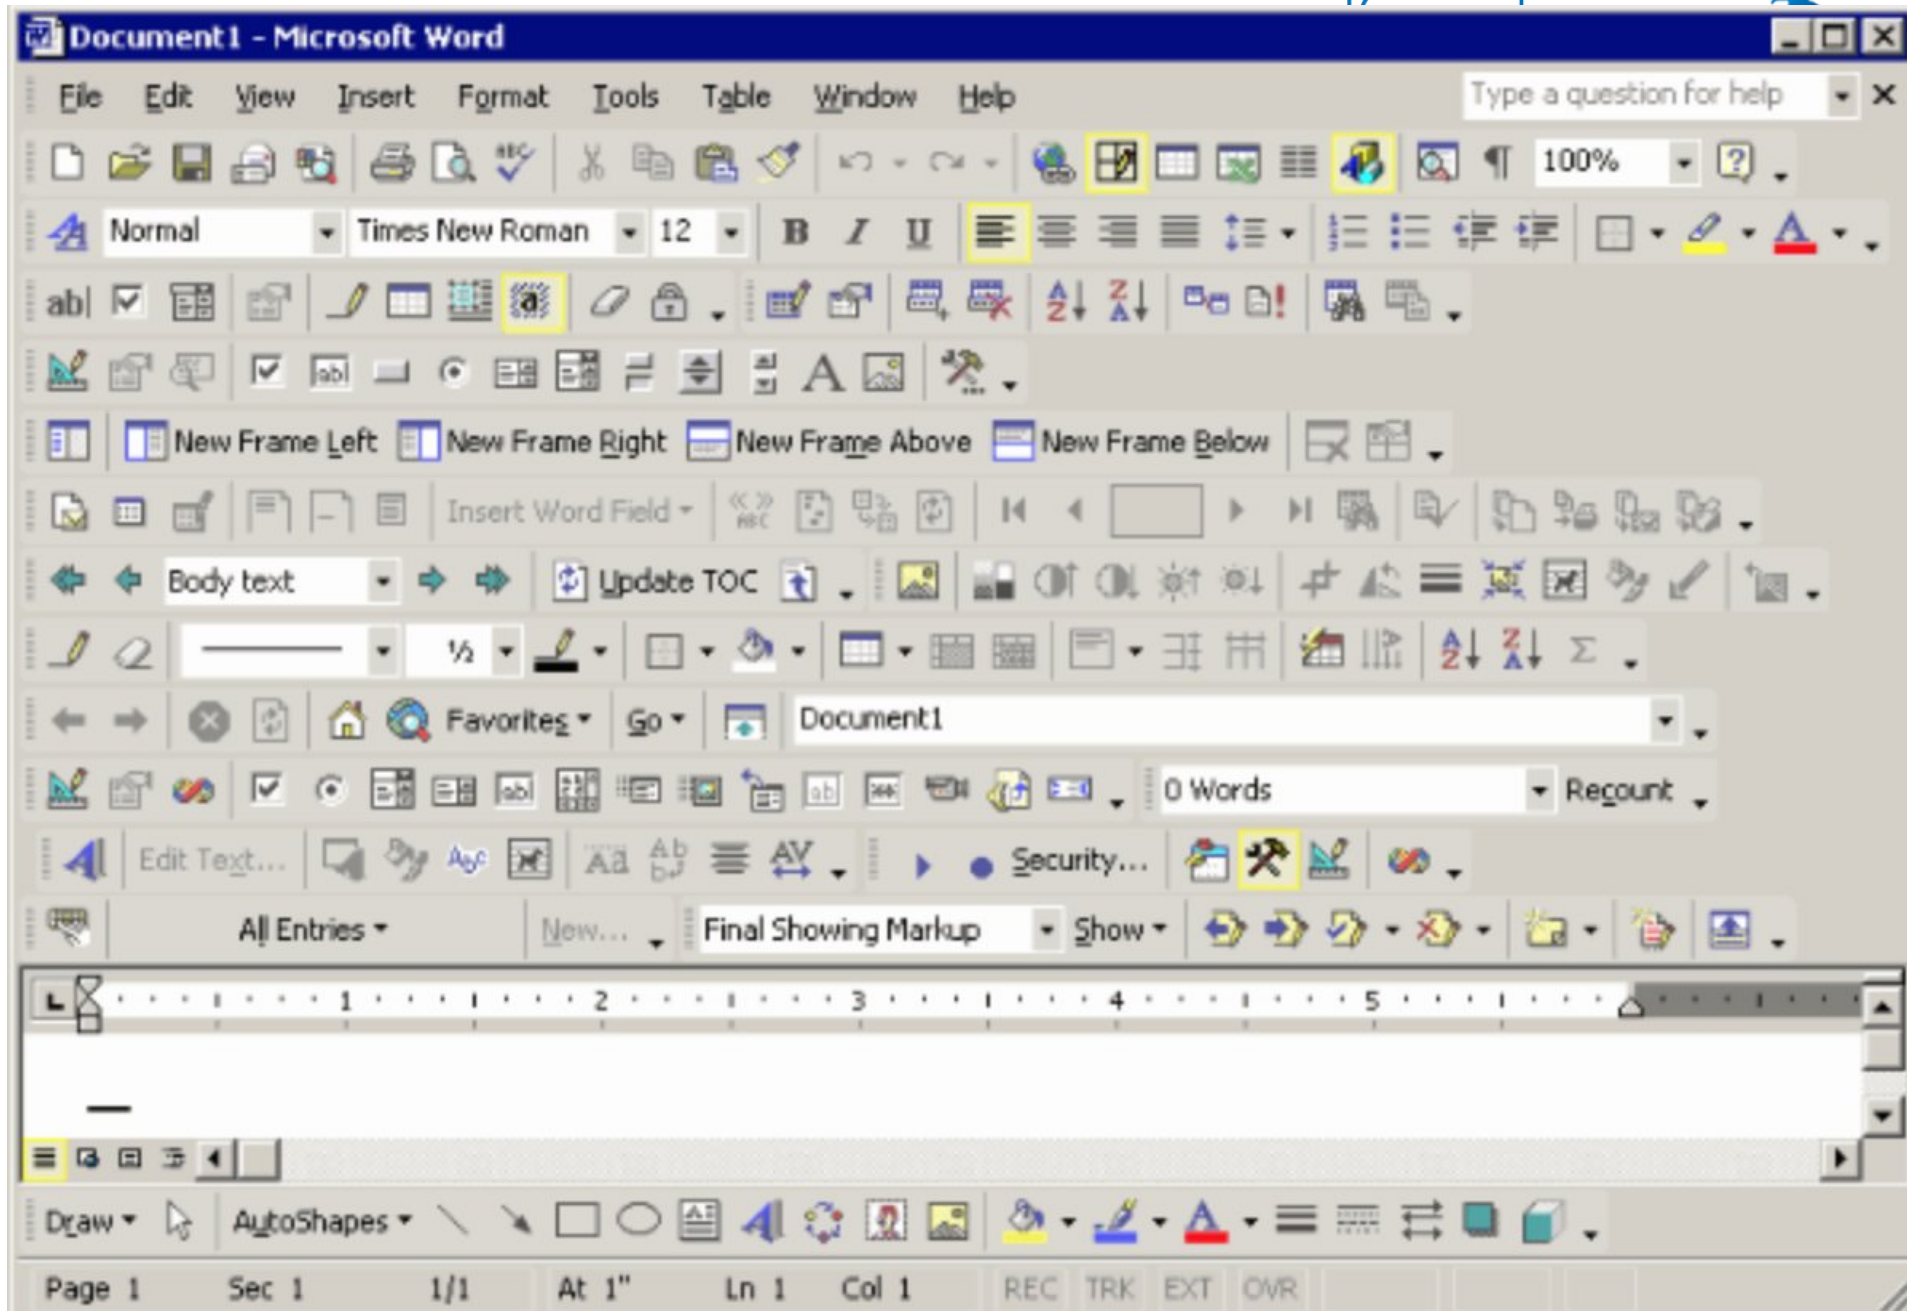

To create a web application that provide an easy to use user interface for dCache Storage

This mean we want
to expose all the
necessary **features**
in dCache through
our **web application**

And this has to
be **clean** and
intuitive to the
end-user.

"It's easy even for great teams building great products to make big UX mistakes because it's not always clear what's going to resonate with users." -
@Real_CSS_Tricks

Cache-View (dV) is part of Frontend service

dV uses the RESTful API to communicate with dCache

At times dV talk to the Webdav door

We started from the basic

dCache View v1.0.0 in Features: dCache 2.16

- Authentication- **with username and password**
- directories listing
- Rename
- Download
- Hover context menu
- User info - **home directory path, gid and uid**

What we've done?

- Migrate to Polymer 2.x
- Redesign of some elements
- Add new elements
- Add accessibility features
- dCache view Admin – see AI talk

Migration to Polymer 2.X

dCache.org

Result of Migration to Polymer 2.x

- Adopt new design paradigm
- Code readability
- Small library – **Polymer 1.x > Polymer 2.x in size**
- Modular components
- Easy to detect error
- trouble-free migration to v3

ded new elements & redesign some

- Rename
- Context menu
- View-file
- Pagination buttons – support drag & drop
- Add support for Roles
- New user information page

</Context-Menu>

Now – dCache View v1.4.2

in dCache 4.1

- Authentication **with OpenID connect** + username and password
- directories listing
- Rename – redesign
- Download + Upload
- Move – with multiple selection
- File Metadata
- Context menu – redesign
- User Information Page
- Drag and Drop
- Quality Of Service
 - Backend information
 - Change QoS
- Create new directory

What is next? - dCache View \geq

- File sharing with macaroon [<demo>](#)
- Viewer
 - PDF [<demo>](#)
 - Image [<demo>](#)
 - Hdf5
 - Video Player
 - Root
 - ODF e.g. word, spreadsheets, presentations, etc.
- Notification – **see Paul's talk**
- Progressive Web Apps (PWAs)
- Upgrade to polymer v3
 - (may be) Android App

<Demo/>

I'm sorry *Cat ate my home*

<thank-you />
